MEG – An exterior self-supporting compact grade laminate available from 2mm thickness upwards. MEG

OBERFLEX – An extensive collection of real wood veneer laminates

WOODGRAINS – A collection of photographic images of woodgrains in a variety of finishes

SPECIALIST PRODUCTS

MEG (MATERIAL EXTERIOR GRADE) – MEG is a compact grade self-supporting high pressure laminate (HPL) which is generally used for cladding the exterior of buildings and other external applications. It carries a BBA Agreement Certificate and is fade-resistant and weather-proof. It can be supplied in standard (MEG) or flame-retardant (MEG F1) versions with decorative surfaces on one or both sides of the panel in 2mm thickness and upwards

LABGRADE – A range of compact grade High Pressure Laminates in 16mm thickness with a durable surface suitable for use in laboratories, schools or hospitals. The surface has been treated to protect it against high heat, chemicals and stains

DIGITAL PRINT – Abet can produce bespoke images printed onto laminate using a digital printing process. These can replicate a fabric, a photograph or can be of an image provided by the customer to specific requirements

PRAL – A man-made solid surface material manufactured by combining a natural mineral with an acrylic polymer. Pral products are highly durable, versatile and formable and both colours and textures run throughout the thickness of the product. Pral is available in plain coloured and speckled effects in various thicknesses

ENGRAVING – A layer of coloured decorative laminate which when routed exposes a contrasting colour through its core

METALLEIDO – Part of the Abet group

Various lightweight honeycombed centred products, including Monocore and Esocore, are produced by Metalleido. These are faced with Abet High Pressure Laminate and are suitable in marine, transport and installations requiring a hard wearing, durable lightweight product

PL – Part of the Abet group

- **PAROCOLOR (Flooring)** – Commercial grade High Pressure Laminate flooring available in wood and solid colour finishes and with complementary textures in both plank form and tiles
- **PAROWALL / SILENTWALL (Wall Panelling)** – High Pressure Laminate bonded boards with a choice of fixing profiles for aesthetic and acoustic installations
- **COESO (Postformed Compact Grade)** – PL has the technology to produce postformed compact grade laminate which can be made according to customer specific requirements for a variety of applications such as shelving, fixtures and counter tops

ABOUT ABET:

Abet Laminati manufactures the world's most innovative laminates created by the best Italian and international designers.

Abet Ltd is the UK & Ireland branch of Abet Laminati, Europe's largest manufacturer of high pressure laminates based in Bra in Northern Italy. The company is renowned for its design flair and has strong links with the best Italian and International designers.

With offices and warehouse in London's Docklands, Abet Ltd can provide advice on the use of laminates for every application be it the conventional, the unusual, the high performance and the purely decorative. Our products are supplied through a network of UK & Ireland distributors.

Abet Laminati is Europe's largest manufacturer of high pressure laminates based in Bra in Northern Italy. The output from their two factories exceeds 220,000 sq metres each day making Abet Europe's largest manufacturer of high pressure laminates.

The company is renowned for its design flair and has strong links with the best Italian and International designers.

Abet Ltd has recently obtained single site certification for the chain-of-custody standards of the Forest Stewardship Council (FSC). This follows on from Abet Laminati which was awarded both FSC and the Programme for the Endorsement of Forest Certification schemes (PEFC) in January 2014 a strict environmental policy and is certified to EN 14001. A copy of the company's environmental statement can be found on the website.
